

VOCATIONAL TRAINING CENTRUM, BANJUWANGI INDONESIA

The Indonesian Ministry of Labour operates 301 vocational training centres nationwide. The tourism and welding training centre in Banyuwangi is being built as turn-key project by eee Austria international projects GmbH. The main objective of the project is to train job-seeking individuals for specific occupations in the tourism and welding industry, making them job-ready for the local labor market. To achieve the competence development of practical knowledge and skills and thus sustainable placement in the local labor market, the focus – adapted to the dual system – is on practical training (at least 70%). In this project, eee Austria international projects GmbH is acting as General Contractor and overall Project Manager.

On behalf of eee Austria international projects GmbH, convex ZT GmbH is responsible for reviewing the Indonesian execution design as well as for supporting the quality assurance of the construction work on site.
